For Immediate Release

Todos Santos' Newest Residential Community of Real de Santa Ana Enters Home Construction Phase!

Infrastructure construction has progressed well since the initial groundbreaking ceremony was held August 27th. The main roads leading to the downtown area have been laid out and the grading on 20 building pads in blocks one and two of the master plan has been completed. A temporary on-site sales center has been built to accept reservations in preparation of the upcoming Christmas season and the expectation of many repeat travelers to the area to take advantage of the pre-construction sales discounts.

Before the end of this month, the foundations for 15 homes will have begun, with the construction of each of the three styles being offered. To view available floorplans, visit todossantosliving.com/realestate/realdesantaana/floorplans.html. It is projected these first homes will be ready for occupancy in June 2008. Three of these homes have already been sold, and it is expected that the balance will be sold out before the end of January 2008.

The City of Todos Santos continues to experience exceptional growth, with the addition of a new bank offering preferred client services, several retail stores including an abundantly stocked organic fruit and vegetable market, and new real estate service businesses such as Title and Escrow closing companies in anticipation of the new arrivals to the area.
